Technical Experience

Experience: decade + frontend development, 8 years of ReactJS, 4 years NodeJS.

Oct 2023 → Current | Senior Frontend Developer at Shepard

- Lead React developer, working on upgrading client Dashboard
- Styling with modern HTML & CSS
- Using Redux-Saga to manage state
- Working with APIs to fetch data

Jun 2022 → Sep 2023 | Founder and Lead Dev at MoonHoldings.xyz

- Lead React developer & Dev manager
- Planned, designed and developed our app in VueJS, then React (Next.js 13) using Redux & TypeScript
- Hired team of full stack developers for further app development
- Pitched, raised capital, sold crypto assets, collaboration with other apps & protocols

May 2019 → Dec 2021 | Senior Frontend Developer at USAA (corp)

- Lead React developer
- Helped mentor and guide junior developers
- Wrote AJAX calls using Fetch
- Wrote and maintained unit & end-to-end tests in Jest & Cypress
- Developed and maintained reusable components, used Redux, TypeScript & JSON
- Used CSS, SASS & styled-components to implement designs in components

Aug 2018 → Mar 2019 | Senior Frontend Developer at Trade.io (startup)

- Lead frontend development and maintained code for Trade.io's web app and website
- Developed in multiple frontend frameworks: React & Angular, HTML & CSS
- Wrote AJAX calls using Fetch and managed state with Redux Saga
- Wrote and maintained unit & end-to-end tests in Jest & Cypress, consumed JSON files
- Wrote and maintained NodeJS backend server code

Jun 2017 → Aug 2018 | Senior Frontend Developer at Yum Brands (corp)

- Created reusable React components for internal Yum Brands apps
- Helped mentor and guide junior developers
- Wrote and maintained unit & end-to-end tests in Jest & Cypress
- Used CSS, SASS & styled-components to implement designs in components
- Used Redux for state management & wrote documentation

Apr 2015 → May 2017 | Lead Frontend Developer – TickerTags.com (startup)

- Lead frontend development, first developer to take and implement the designs & requirements
- Build the TickerTags Dashboard using AngularJS, HTML & CSS3
- Wrote AJAX calls using Promises
- Used Angular-UI to manage state, eventually moved the code base over to React
- Wrote backend code for our NodeJS server
- Took initiative to design components & views we needed

Aug 2014 → Apr 2015 | Frontend Developer – AT&T (corp)

- Used ReactJS & jQuery to develop internal AT&T apps
- Used jQuery to create animations for internal products
- Wrote AJAX calls with JS callbacks to make requests
- Helped mentor and guide junior developers
- Used CSS & SASS to maintain styles

May 2013 → Aug 2014 Front-End Developer – Who@ (startup)

- Developed the frontend of Whoat's app with jQuery using module pattern
- Wrote AJAX calls with JS callbacks to make requests
- Interacted with Python based APIs
- Worked closely with designer on components and features
- Used CSS & SASS to maintain styles

Nov 1999 to May 2013 worked for multiple clients & companies

More work history: https://www.linkedin.com/in/leongaban

Education 1997 → 1999 Associates of Applied Arts

The Art Institute of Dallas 3D modeling and animation, photoshop, illustrator, after effects, flash 3.9 GPA

Studied graphic design, multimedia and 3D animation Honors: Accepted into the graduate Honors class.
